MAIA Cloud Connector Plugin

Software Licence Agreement

R1.0 - February 15, 2022

MAIA Cloud Connector Plugin Software Licence Agreement

Owner of MAIA CLOUD and related services

Carlo Gavazzi Controls SPA - single shareholder
Viale Lunigiana, 46
20125 Milan, Italy
Subjected to direction and coordination of the holding company Carlo Gavazzi Holding Ag
VAT Number: 10319150156
Paid up share capital: 916.000 Eur i.v.
Chamber of Commerce of Milan
privacy.cgc@gavazziacbu.it

These General Terms and Conditions are subject to change without notice, and comprise a legal agreement (License Agreement) between Carlo Gavazzi (the Author or the Licensor) and the person, company or other legal entity (the User or Licensee) who, by opening the envelope containing storage media, installing and/or using the Software, part of the Software, or merely visually observing its media contents, thereby confirms the User-Licensee's acknowledgement and complete acceptance of the License Agreement General Terms and Conditions.

By accepting and agreeing to the License, the User-Licensee likewise takes notice and acknowledges and agrees to all other documental, informative and explanatory materials, included with the software or made available in electronic form or online.

If the software has been obtained by downloading from the web, these Terms may be found here: Terms and Conditions < https://gavazziautomation.com/images/PIM/MANUALS/ENG/TC_MAIA_ML.pdf >.

The Contracting Parties agree that this Agreement (License) is valid, with the equal force of a contract that was negotiated and signed by the Contracting Parties.

If you do not agree to be bound to the terms of this agreement, or if you are lacking authority to do so, you should not install or use the software, and you should return the Software in its original packaging within 10 days of purchase.

The User-Licensee may negotiate directly with Carlo Gavazzi Controls SPA a separate written agreement to complement or replace all and/or part of this contract.

1) Subject Matter of the Agreement

1.1) The purpose and legal purpose of this agreement is the utilization, for a consideration, of the Software "MAIA Cloud Connector Plugin Software" by the User-Licensee.

1.2) In accordance with the terms and conditions of this Agreement, Carlo Gavazzi Controls SpA (Author or Licensor) grants the end user (User or Licensee) a non-exclusive and non-transferable right (License) to use the Software "MAIA Cloud Connector Plugin Software". The software, documentation and materials relating to this License, on disk, read-only memory, or any other media or form, are licensed, not sold, in order to be used only under these limited license terms.

1.3) The rights granted through this agreement are limited only to Carlo Gavazzi Controls SpA's intellectual property rights for the Software "MAIA Cloud Connector Plugin Software" and do not include any other patents or intellectual property rights.

1.4) Carlo Gavazzi Controls SpA informs the user that, in general, no software can be developed to function without error as to all its possible applications and uses. In addition, updated versions of software may introduce new errors, which are not in previous versions. The User-Licensee agrees with the Author, and accepts that the Software may contain errors, and, as such, hereby he or she renounces all claims against the Author for such errors. Therefore, in his self-interest and in order to avoid damages to himself and / or others, the User-Licensee agrees to continually maintain and be responsible for, before, during and after each operation, accurate checks and controls, and to take accurate and detailed recordings, in order to rapidly discover and obviate possible Software malfunctions. The acceptance of the possibility that the Software may contain errors, the acceptance of the obligation to make all checks and inspections referred to in the preceding paragraph, and the acceptance of the fact that the author does not declare its software suitable for any particular purpose or effect, are conditions that must be met in order for the Author-Licensor to grant you the Software license.

1.5) As Licensee, the User is sole owner of any and all physical materials on which the Software was originally recorded. Thus, under this Agreement, the Author maintains the sole ownership of the physical materials and all otherwise classified rights within the Software. This License grants the User alone the right to use the Software in accordance with these Terms and Conditions, which is subject to further conditions and warnings that may be placed on the packaging, in the user manual, in the electronic documentation or in the online documentation of the product itself. All rights are reserved to the author or to other legitimate owners. This License does not include other service of support, maintenance, consultancy, staff training or any other kind of performance that is not expressly agreed to by the Author and by these Terms granted in writing.

2) Copyright

All rights and copyrights of the Software (including, but not limited to, images, photographs, animation, video, audio, music, text and other information attached in the Software), the accompanying printed materials and any Software copies, are property of Carlo Gavazzi Controls SpA. The Software is protected by copyright laws and international conventions. Pursuant to these copyright protections, the User must properly use the software as every other material covered by copyright, unless otherwise permitted by this License. The Software and all the authorized copies approved by Carlo Gavazzi Controls SpA are intellectual property, solely owned by Carlo Gavazzi Controls SpA. The Software structure, organization and code are valuable trade secrets and confidential information owned by Carlo Gavazzi Controls SpA. Except as expressly provided for in this contract. This Agreement does not grant the User any intellectual property right as to the Software; unless a right is expressly granted in this Agreement, it is reserved by Carlo Gavazzi Controls SpA.

2.1) Acknowledgment about third party software: some parts of the Software use or include software of third party or other material subject to copyright: Qt, QIron,Scythia.

3) Product Usage (Company License)

3.1) This License is intended for business use; the Licensee may install and use the Software on multiple computers and/or machines of the same company, under the conditions and terms of this License.

As such, this License allows the simultaneous coexistence of this software on more than one computer, and the Software may be made available on a network, to be used by multiple computers simultaneously.

The User can also make a backup copy of the program (only the original) or create a copy of the "backup" to be used only in the case the original copy is damaged. The materials, containing the backup copy together with any copies for business use, must be kept with diligence, in order to prevent the installation or use by any third parties, or transfer of the content in any way or form, to any third parties. As an express condition of this License, when producing a backup copy or any additional copies, you must reproduce, on the cover, every notice regarding the copyright, and any other rights or restriction indicated on the original copy, supplied by the Author.

3.2) If the Software is licensed for use as a new program version (Upgrade) or as a program update (Update), the new software may only be used to replace existing versions of the same software for which you previously possess a valid license. The User recognizes that the new program version (Upgrade) or the update (Update) does not constitute the granting of a new Software license, nor modify the obtained rights of the License in possession, and in no case may you transfer the original Software or new versions to any third party.

It is understood that this License grants a right to use the Software, and only the Software, which is the subject

of this Agreement. This License does not grant the new versions (Upgrade), updates (Update) or any other software by the same Author, not even if they have the same name and/or version, if they perform the same type of work, or if they have the same and/or similar graphical interface and/or source code.

3.3) The Software is considered a trade secret, and, therefore, cannot be fragmented, reverse-engineered or otherwise reduced in any manner perceptible to man or readable by computer devices. It is forbidden to modify, adapt, translate, sell, rent, lease, transfer, or tamper with the Software in any way.

These restrictions also apply to the Software parts, such as images, icons, help files (manuals and/or forms), the documental, informative and explanatory materials attached to the Software, and all the support files created by the Author. The User undertakes the responsibility of ensuring the protection of the Author's copyright and ownership, and ensuring he will not cancel, alter or remove any marks or names referring to the Author.

3.4) The Software is licensed for use as a single product. Its component parts may not be separated for use in different computing environments.

3.5) The User is not authorized to transfer or to hand the license of the Software over to a third party, even temporarily. The User is also prohibited from transferring or handing over the accessories rights legally acquired by the User to a third party.

3.6) If the User does not comply with these Terms of the Software Agreement, resulting in a default or violation by the User of the above-mentioned provisions and/or other provisions of or complementary to the Contract, such as those provided online or with the Software documentation, this Contract will be legally null and void.

In this case the Author is entitled to require that the User arrange for the return and/or destruction of all the Software copies, and all component parts in his possession, including documentation materials. The Author also reserves the right to seek damages from the User and to require the User take steps to remedy the situation. The Author will not, under any circumstances, be required to compensate the User.

4) Warranties and Liability

4.1) Carlo Gavazzi Controls SpA ensures that the Software is exempt from defects and conforms to the technical specifications contained in the Technical Documentation. Carlo Gavazzi Controls SpA does not assume any express guarantee of good Software functioning.

The guarantee lasts two years after the activation of the Software, as long as payment has been made and the existence of any defect is communicated to the Author, by notification within eight (8) days from the date of discovery.

4.2) When repair is not possible, or not convenient, or when it is not possible to update the Software online, Carlo Gavazzi Controls SpA reserves the right to substitute, free of charge, the original Software with a new one, without any further liability to the User.

4.3) It is understood that Carlo Gavazzi Controls SpA does not assume any liability for Software defects that arise from the User's failure to duly follow the instructions for the Software contained in the Technical Documentation, the User's tampering, improper use or incorrect installation, configuration, maintenance, reparation, modification or alteration by either the User or by third parties.

4.4) Except for cases of mens-rea and negligence, Carlo Gavazzi Controls SpA excludes any other liability of the same, both contractual and extra-contractual, even originated by the Software utilization, such as, for example, the compensation for direct or indirect damages, including losses, or loss of profits, costs, expenses, including the possible retreat of the market of the Software, lost profits, interruption of the Software operation, however, limiting the possible overall responsibility for Carlo Gavazzi Controls SpA to compensation for an amount not exceeding the amount actually paid by the User for the Software. In no case will the Author be responsible for any damages, foreseeable or unforeseeable, special or not special, incidental or consequential, incurred by the User or by any third party, nor will the Author be responsible for the inability to use Software or the malfunction of the Software, not even in the case that the Author has been advised of the possibility of such damages.

The Author does not assume any liability resulting from the use or non-use of the Software or its malfunction. This liability limitation applies, not only to cases of Software use that does not conform to the provided instructions, but also to cases when use is in accordance with the same.

4.5) The User agrees to be aware that:

- Software operation may be affected by adverse factors, including, but not limited to, fluctuations in power supply, malfunction of the devices connected to the hardware, installation errors, malfunctions or control devices failures, transient failures of the electronic systems (hardware and/or software), malfunction or failure of signaling equipment (fax, GSM or fixed-line, relay), unexpected wrong uses, or errors from the User or from application designer (effects from these adverse factors hereinafter referred to as "System Failures"),

- any application in which a System Failure could create a damage risk to property or persons (including the risk of injury and death) should not count exclusively on the electronic monitoring,

- to avoid damages, injuries or death, the User must take reasonably careful measures in order to protect against System Failures, including, but not limited to, the exclusion of backup and off mechanisms,

- each system of the User is adapted and differs from the systems in which tests are conducted by Carlo Gavazzi Controls SpA, and as the User may use the Software together with other products, which may not have been

evaluated or contemplated by Carlo Gavazzi Controls SpA, the User is responsible for the final verification and validation of the Software compliance in all cases in which the Software is incorporated in a system and/or application, including, but not limited to, the appropriate project, level of procedures and security of the system and/or application.

5) Partial Application and Contract Amendments

5.1) If an invalidity or unenforceability of any provision of this Agreement is established, such invalidity or unenforceability will not divest the validity of any other provision therein, which shall remain in effect and enforceable.

5.2) In the unforeseeable case that a provision may be amended by the decision of a judicial authority, so as to render it unenforceable, such provision shall be so reformed.

6) Governing Law and Jurisdiction

6.1) This Agreement is governed by the laws of Italy. For any dispute concerning or arising under this Agreement, its enforcement or its interpretation, Italy shall have exclusive original jurisdiction.

6.2) The Author and User expressly declare to exclude the application of this Agreement in regards to the United Nations Convention on Contracts for the International Sale of Goods, adopted in Vienna on April 11, 1980, and subsequent modifications

Third Parties Copyrights

QT
This software links Qt, the cross platform development and UI framework, that is licensed under LGPL v2 terms. Qt is licensed under the terms of GNU LIBRARY LESSER GENERAL PUBLIC License(LGPL). This software contains no derivative of any portion of Qt but is designed to work with Qt by being compiled or linked with it. This software is therefore to be considered a work which uses Qt. This work is a derivative of the Library so It falls outside of the LGPL License (LGPL License, paragraph 5).

QIron
This software links QIron. QIron is licensed under the terms of of GNU LIBRARY LESSER GENERAL PUBLIC License(LGPL). This software contains no derivative of any portion of QIron but is designed to work with QIron by being compiled or linked with it. This software is therefore to be considered a work which uses QIron. This work is a derivative of the Library so It falls outside of the LGPL License (LGPL License, paragraph 5).

Scythia

This software links Scythia. Scythia is licensed under the terms of of GNU LIBRARY LESSER GENERAL PUBLIC License(LGPL). This software contains no derivative of any portion of Scythia but is designed to work with Scythia by being compiled or linked with it. This software is therefore to be considered a work which uses Scythia. This work is a derivative of the Library so It falls outside of the LGPL License (LGPL License, paragraph 5).

GNU LESSER GENERAL PUBLIC LICENSE

Version 2.1, February 1999, Copyright (C)1991, 1999 Free Software Foundation, Inc. 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA. Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

[This is the first released version of the Lesser GPL. It also counts as the successor of the GNU Library Public License, version 2, hence the version number 2.1.]

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public Licenses are intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This license, the Lesser General Public License, applies to some specially designated software packages--typically libraries--of the Free Software Foundation and other authors who decide to use it. You can use it too, but we suggest you first think carefully about whether this license or the ordinary General Public License is the better strategy to use in any particular case, based on the explanations below. When we speak of free software, we are referring to freedom of use, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish); that you receive source code or can get it if you want it; that you can change the software and use pieces of it in new free programs; and that you are informed that you can do these things. To protect your rights, we need to make restrictions that forbid distributors to deny you these rights or to ask you to surrender these rights. These restrictions translate to certain responsibilities for you if you distribute copies of the library or if you modify it. For example, if you distribute copies of the library, whether gratis or for a fee, you must give the recipients all the rights that we gave you. You must make sure that they, too, receive or can get the source code. If you link other code with the library, you must provide complete object files to the recipients, so that they can relink them with the library after making changes to the library and recompiling it. And you must show them these terms so they know their rights. We protect your rights with a two-step method: (1) we copyright the library, and(2) we offer you this license, which gives you legal permission to copy, distribute and/or modify the library. To protect each distributor, we want to make it very clear that there is no warranty for the free library. Also, if the library is modified by someone else and passed on, the recipients should know that what they have is not theoriginal version, so that the original author's reputation will not be affected by problems that might be introduced by others. Finally, software

patents pose a constant threat to the existence of any free program. We wish to make sure that a company cannot effectively restrict the users of a free program by obtaining a restrictive license from a patent holder. Therefore, we insist that any patent license obtained for a version of the library must be consistent with the full freedom of use specified in this license. Most GNU software, including some libraries, is covered by the ordinary GNU General Public License. This license, the GNU Lesser General Public License, applies to certain designated libraries, and is quite different from the ordinary General Public License. We use this license for certain libraries in order to permit linking those libraries into non-free programs. When a program is linked with a library, whether statically or using a shared library, the combination of the two is legally speaking a combined work, a derivative of the original library. The ordinary General Public License therefore permits such linking only if the entire combination fits its criteria of freedom. The Lesser General Public License permits more lax criteria for linking other code with the library. We call this license the "Lesser" General Public License because it does Less to protect the user's freedom than the ordinary General Public License. It also provides other free software developers Less of an advantage over competing non-free programs. These disadvantages are the reason we use the ordinary General Public License for many libraries. However, the Lesser license provides advantages in certain special circumstances. For example, on rare occasions, there may be a special need to encourage the widest possible use of a certain library, so that it becomes a de-facto standard. To achieve this, on-free programs must be allowed to use the library. A more frequent case is that a free library does the same job as widely used non-free libraries. In this case, there is little to gain by limiting the free library to free software only, so we use the Lesser General Public License. In other cases, permission to use a particular library in non-free programs enables a greater number of people to use a large body of free software. For example, permission to use the GNU C Library in non-free programs enables many more people to use the whole GNU operating system, as well as its variant, the GNU/Linux operating system. Although the Lesser General Public License is Less protective of the users' freedom, it does ensure that the user of a program that is linked with the Library has the freedom and the wherewithal to run that program using a modified version of the Library. The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a "work based on the library" and a "work that uses the library". The former contains code derived from the library, whereas the latter must be combined with the library in order to run.

GNU LESSER GENERAL PUBLIC LICENSE, TERMS AND CONDITIONS FOR COPYING,DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any software library or other program which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Lesser General Public License (also called "this License"). Each licensee is addressed as "you". A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables. The "Library", below, refers to any such software library or work which has been distributed under these terms. A "work based on the Library"

means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without limitation in the term "modification"). "Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library. Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it).Whether that is true depends on what the Library does and what the program that uses the Library does.

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library. You may charge a fee for the physical act of transferring copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions: a) The modified work must itself be a software library. b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change. c) You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this License. d) If a facility in the modified Library refers to a function or a table of data to be supplied by an application program that uses the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs whatever part of its purpose remains meaningful.(For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the application does not supply it, the square root function must still compute square roots.) These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Library, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it. Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Library. In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on

the Library) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may opt to apply the terms of the ordinary GNU General Public License instead of this License to a given copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNU General Public License, version 2, instead of to this License. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify that version instead if you wish.) Do not make any other change in these notices. Once this change is made in a given copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy. This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

4. You may copy and distribute the Library (or a portion or derivative of it, under Section 2) in object code or executable form under the terms of Sections 1and 2 above provided that you accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange. If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

5. A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a "work that uses the Library". Such a work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License. However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the Library (because it contains portions of the Library), rather than a "work that uses the library". The executable is therefore covered by this License. Section 6 states terms for distribution of such executables. When a "work that uses the Library" uses material from header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law. If such an object file uses only numerical parameters, data structure layouts and accessories, and small macros and small inline functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative work.(Executables containing this object code plus portions of the Library will still fall under Section 6. Otherwise, if the work is a derivative of the Library, you may distribute the object code for the work under the terms of Section 6. Any executables containing that work also fall under Section 6, whether or not they are linked directly with the Library itself.

6. As an exception to the Sections above, you may also combine or link a "work that uses the Library" with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse

engineering for debugging such modifications. You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work during execution displays copyright notices, you must include the copyright notice for the Library among them, as well as a reference directing the user to the copy of this License. Also, you must do one of these things:

a)Accompany the work with the complete corresponding machine-readable source code for the Library including whatever changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable "work that uses the Library", as object code and/or source code, so that the user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions).

b) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (1) uses at run time copy of the library already present on the user's computer system, rather than copying library functions into the executable, and (2) will operate properly with a modified version of the library, if the user installs one, as long as the modified version is interface-compatible with the version that the work was made with.

c) Accompany the work with a written offer, valid for at least three years, to give the same user the materials specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution.

d) If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified materials from the same place.

e) Verify that the user has already received a copy of these materials or that you have already sent this user a copy. For an executable, the required form of the "work that uses the Library" must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the materials to be distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable. It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

7. You may place library facilities that are a work based on the Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined library, provided that

the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things:

a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be distributed under the terms of the Sections above.

b) Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

8. You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

9. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, an all its terms and conditions for copying, distributing or modifying the Library or works based on it.

10. Each time you redistribute the Library (or any work based on the Library),the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients 'exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties with this License.

11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library. If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances. It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in

reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice. This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

12. If the distribution and/or use of the Library is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

13. The Free Software Foundation may publish revised and/or new versions of the Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns. Each version is given a distinguishing version number. If the Library specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

14. If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally. NO WARRANTY

15. because the library is licensed free of charge, there is no warranty for the library, to the extent permitted by applicable law. except when otherwise stated in writing the copyright holders and/or other parties provide the library "as is" without warranty of any kind, either expressed or implied, including, but not limited to, the implied warranties of merchantability and fitness for a particular purpose. the entire risk as to the quality and performance of the library is with you. should the library prove defective, you assume the cost of all necessary servicing, repair or correction.

16. in no event unless required by applicable law or agreed to in writing will any copyright holder, or any other party who may modify and/or redistribute the library as permitted above, be liable to you for damages, including any general, special, incidental or consequential damages arising out of the use or inability to use the library (including but not limited to loss of data or data being rendered inaccurate or losses sustained by you or third parties or a failure of the library to operate with any other software), even if such holder or other party has been advised of the possibility of such damages.

End of terms and conditions.
